PROFESSIONAL SUMMARY

Strategic **Chief Technology Officer** and **AI Engineer** with **6+ years of experience** building scalable products across fintech, travel, and emerging technology sectors. Skilled in **Backend Development**, **System Architecture**, **Cloud Infrastructure**, and integrating modern **AI Agents** and **RAG pipelines** into production applications. Proven track record **leading engineering teams** and delivering reliable software from concept to scale.

TECHNICAL SKILLS

- **Languages/Frameworks:** PHP (Laravel, Lumen), TypeScript (Node/Express, Next.js)
- **AI & Data:** LLM Integration (Gemini, OpenAI), MCP (Model Context Protocol), VectorDB, Ingestors, AI Agents.
- **Infrastructure/Tools:** AWS (EC2, RDS, S3), GCP, DigitalOcean, Docker, CI/CD, Redis, MySQL, PostgreSQL, Sentry.
- **Leadership:** Strategic Roadmapping, Agile Methodologies, Cross-functional Team Management, Mentorship.

EXPERIENCE

Collo Africa, Lagos, NG – *Chief Technology Officer (CTO)*

April 2025 – PRESENT

Industry: FinTech

Stack: Laravel, Next.js, Flutter, AWS (Elastic Beanstalk, RDS, EC2), MySQL, Redis, Sentry

- Architected the 2025 Private MGR product stabilization and the 2026 Engineering Strategic Plan, overseeing the development and rollout of Public MGR, Savings Plan, and Loan modules.
- Spearhead technical recruitment and mentorship programs to scale the internal engineering culture.
- Architected cloud infrastructure supporting scale from 2K to 40K+ users, implementing Redis caching and EC2 auto-scaling as priority performance improvements.

Travel Avatar, California, US – *Chief Technology Officer (CTO)*

September 2023 – PRESENT

Industry: Travel, Leisures and Tour

Stack: Laravel, PHPUnit, Eloquent, Postgress/MySQL, Sentry, AWS

- Implemented industry-standard engineering practices improving development velocity and code quality.
- Crafted project roadmaps, defined development requirements and aligned development cycles with business goals to ensure streamlined delivery.
- Aligned Development Team with cross-functional departments and business goals, fostering streamlined project delivery and innovation.

IQAICom, US – *AI Engineer*

January 2025 – July 2025

Industry: Web3 AI

Stack: Turbo, VectorDB, Typescript, CI/CD, LLM, FastMCP, Docker, AI Agent, Nestjs, Sentry etc

- Deployed and manage the AI Agents with Docker and CI/CD, first on D0 then migrated to GCP
- Handle migration of LLM powering the AI Agents from OpenAI to Gemini LLM
- Published multiple MCP packages to npm – MCP-Fraxlend, MCP-Odos, MCP-ABI, and MCP-Near.
- Built AI Agents using the IQAI TypeScript ADK (Agent Development Kit) with MCP integrations.
- I worked on documentation of the IQAI ADK, MCPs and part of Brain Doc

Centiiv Technologies, Lagos, Nigeria – *Engineering Team Lead*

June 2023 – November 2023

Industry: FinTech

Stack: Node/Expressjs, Prismajs, Postgress/MySQL, Redis and BullMQ

- Streamlined project roadmap, enforced industry standards, codebase refactoring, managed features effectively with effective task assignment and coordination.
- Integrated APIs for cryptocurrency onramping/offramping, and expanded fiat currency options flexibly while reducing reliance on third-party exchange rates.

Tramango Limited, Lagos, Nigeria – *Backend Engineer*

March 2022 – June, 2023

Industry: Travel, Leisures and Tour

Stack: Laravel and MySQL/PgSQL

- Built the 5 major travel products and Integrated several third-party APIs like Amadeus, Alliance etc
- Developed multi-currency (5) wallet system, including vendor cashout and admin-managed conversion rates. Created cron job scheduler for balance updates, database maintenance, and flight info management.
- Integrated barcode generation API with event booking system for streamlined user and vendor attendance validation, enhancing efficiency and user experience.

GIGS/SIDE PROJECTS

PermutoAI – AI Safety and Compliance Agent

February 2026

Stack: Typescript, LLM, Multi-Agent Architecture, RAG pipeline, Vector DB(qDrant)

Description: AI-powered **Electronic Permit-to-Work (ePTW)** system for **Nigerian oil and gas operations**. Features include multi-agent risk assessment, compliance checking, **SIMOP (simultaneous operations) management**, predictive scheduling, hazard suggestion, and intelligent routing for safety-critical workflows.

PharmAssist – AI Pharmacy Agent

December 2025

Stack: LLM, Embeddings, Docker, TypeScript, RAG pipeline, Vector DB(qDrant)

Description: AI-powered pharmaceutical search agent built for MedPlus. Leverages embeddings and vector search to deliver intelligent drug information retrieval and pharmaceutical query resolution for users and pharmacy staff.

PERSONAL/OPENSOURCE PROJECTS

nVestPadi – Stock Investment Buddy

December 2025

Stack: LLM, AI Agents, Financial APIs, TypeScript

Description: AI-powered investment assistant that provides analysis, updates, and insights on NGX (Nigerian Exchange) and US stock markets, helping users make informed investment decisions.

SocialMCP – npm MCP Package

June 2025

Stack: TypeScript, MCP, WhatsApp API, Telegram API, X (Twitter) API

Description: Open-source MCP package published on npm that enables AI agents to post, reply, and manage interactions across WhatsApp, Telegram, and X (Twitter), extending agentic social media capabilities.

TravelMind – *AI Travel Agent*

November 2024

Stack: LLM, AI Agents, Nextjs

Description: Conversational AI travel agent that handles end-to-end itinerary planning and travel recommendations, powered by LLM-based reasoning and real-time information retrieval.

KeyPal Vault – *Open Source API Project*

June 2023

Stack: Laravel, MySQL, PHPUnit

Description: Collaborative secrets management API supporting team-based secret sharing across website passwords, environment variables, and file secrets – with role-based Super Admin and Admin controls.

EDUCATION

Obafemi Awolowo University, Ife, Nigeria – *BSc.*

May 2016 – October 2021.

Engineering Physics (Second Class Honors)

Theoretical Physics Thesis: “Spin-Orbital Interactions and Superposition Theory”

- Presidential Candidate, Physics and Engineer Physics Students Association, OAU – 2018/2019
- Computer Coordinator, Physics and Engineer Physics Students Association, OAU, 2017/2018

ACHIEVEMENTS

- Participant, Cohort 1, Facebook Developer Circles and Andela #BuildForSDG Challenge – 2020
- Participant, Google Africa Developer Scholarship – 2020,2021
